

COMPLETE SYSTEM CONTROLS

- Pulse cleaning controls
- Dirty filter pressure monitoring with digital display & alarms
- Motor starter with fuses & main disconnect
- Start stop buttons
- Blower running lights
- NEMA 4 standard

FEATURES & BENEFITS

- All voltages available: 230V/460V , 208V, 575V
- Fan HP from 1HP to 200HP
- 50Hz & 60Hz frequency
- NEMA 4/12 enclosure, NEMA 4X available
- MOD/BUS communication protocols available
- Clear, permanent user instructions right on the box
- Controls pulsing based on filter pressure differential so filters get cleaned only when needed, saving compressed air (energy) and extend filter life
- UL tested and listed
- CE tested and listed
- External Outputs: High pressure alarm and 4-20 mA signal for liner pressure readout.
- **Optional items:**
 - Variable Frequency Drive (VFD) for precise fan control
 - Airflow meter
 - Alarm inputs for level probe
 - Airlock & screw conveyor controls

Variable Frequency Drive (VFD)
